# Deprecated features

## FE\_USER\_LOGGED\_IN

The constant `FE_USER_LOGGED_IN` has been deprecated and will be removed in Contao 5.0. Use the token checker service instead:

```
$hasFrontendUser = System::getContainer()->get('contao.security.token_checker')->hasFrontendUser();
```

## kernel.packages

The `kernel.packages` parameter has been deprecated in Contao 4.5 and will be removed in Contao 5.0. Use `PackageUtil::getVersion()` instead.

```

    *
    * @deprecated Depreciated since Contao 4.0, to be removed in Contao 5.0.
    * ..... Use the Symfony CSRF service via the container instead.
    */
class RequestToken
{

```

```

... private function handleRequestToken(): void
... {
...     /** @var RequestToken $requestToken */
...     $requestToken = $this->getAdapter(RequestToken::class);
...
...     // Depreciated since Contao 4.0, to be removed in Contao 5.0.
...     if (!\defined('REQUEST_TOKEN')) {
...         \define('REQUEST_TOKEN', 'cli' === \PHP_SAPI ? 'cli' : 'web');
...     }
... }
1

```

Class 'RequestToken' is deprecated

```
class RequestToken |Contao\RequestToken
```
