## Content elements [↗](#)

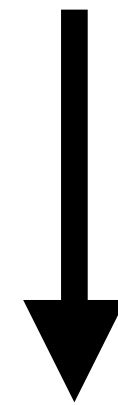

The following content element types have been rewritten as fragment controllers with Twig-only templates:

- `code` ( `ce_code` → `content_element/code` )
- `headline` ( `ce_headline` → `content_element/headline` )
- `html` ( `ce_html` → `content_element/html` )
- `list` ( `ce_list` → `content_element/list` )
- `text` ( `ce_text` → `content_element/text` )
- `table` ( `ce_table` → `content_element/table` )
- `hyperlink` ( `ce_hyperlink` → `content_element/hyperlink` )
- `toplink` ( `ce_toplink` → `content_element/toplink` )
- `image` ( `ce_image` → `content_element/image` )
- `gallery` ( `ce_gallery` → `content_element/gallery` )
- `youtube` ( `ce_youtube` → `content_element/youtube` )
- `vimeo` ( `ce_vimeo` → `content_element/vimeo` )
- `downloads` ( `ce_downloads` → `content_element/downloads` )
- `download` ( `ce_download` → `content_element/download` )
- `player` ( `ce_player` → `content_element/player` )
- `teaser` ( `ce_teaser` → `content_element/teaser` )

The legacy content elements and their templates are still around and will only be dropped in Contao 6. If you want to
