Two-factor authentication

✓ Two-factor authentication has been enabled.

Disable

Two-factor backup codes

Backup codes can be used to access your account in the event you lose access to your device and cannot receive two-factor authentication codes.

Treat your backup codes with the same level of attention as you would your password! We recommend saving them with a password manager such as Lastpass, 1Password, or Keeper.

1 Put these in a safe spot. If you lose your device and don't have the backup codes you will lose access to your account.

Generate new backup codes

When you generate new backup codes, you must download or print the new codes. Your old codes won't work anymore.
