Applications

Contao offers you great freedom when it comes to creating navigations on a website. Eight different modules with their own options help you to cover almost every way you could think of to lead visitors to the information they are looking for. A big part of the navigation of a site tree based CMS with nested pages is the concept of start and stop levels.

Let's try to get a little insight into this concept and explain what can be accomplished with Contao.

Navigation menus

- Home
- Music
  - Genres
    - Rock
    - Pop
  - Artists
    - Mrs. X
