Create a Page record

REQUEST BODY SCHEMA: application/json

required

The Page payload.

pid ›
object or null
Use the move operation to change the parent or position of an existing record.

title
string (Page name) <= 255 characters
Default: `""`
Please enter the page name.

type
string (Page type) <= 64 characters
Default: `"regular"`
Please choose the page type.

alias
string (Page alias) <= 255 characters
Default: `""`
The page alias is a unique reference to the page which can be called instead of its numeric ID.

requireItem
boolean (Require an item)
Default: `false`
Trigger a 404 error if the page URL does not contain an item alias.

routePriority
integer (Route priority)
Default: `0`
Optionally configure the priority to affect the order of routes.
Default: 0

pageTitle
string (Page title) <= 255 characters
Default: `""`

POST /contao/api/dc/page
