content_element/headline x | content_element/_base x | component/_headline x

Create custom template

1

@Contao_ContaoCoreBundle/component/_headline.html.twig

Bundle namespace (ContaoCoreBundle)

origin

```
1  {#
2      This component outputs a semantic headline.
3
4          <h1>headline</h1>
5
6      Mandatory variables:
7          @var string text
8
9      Optional variables:
10         @var string tag_name
11         @var \Contao\CoreBundle\String\HtmlAttributes attributes
12
13     Note:
14         You can either group all variables in an object named
               "headline" or
15         all directly in the context. Grouping under an object has
               precedence.
16 #}
17
   Block "headline_component"
18 {% block headline_component %}
19     {% set headline = headline|default(_context) %}
```

content_element/headline x

Create custom template | Create variant

Modify "content_element/headline" by creating a custom template

1

@Contao_ContaoCoreBundle/content_element/headline.html.twig

Bundle namespace (ContaoCoreBundle)

origin

```
 @Contao/content_element/_base.html.twig
1 {% extends "@Contao/content_element/_base.html.twig" %}
 @Contao/component/_headline.html.twig
2 {% use "@Contao/component/_headline.html.twig" %}
3
 Block "wrapper"
4 {% block wrapper %}
5     {# The "headline" content element does not have a wrapper element, so the
6        wrapper attributes must be applied to the "_headline" component. #}
7     {% with {headline: headline|default(_context)|merge({attributes})} %}
8         {{ block('headline_component') }}
9     {% endwith %}
10 {% endblock %}
11
```
