Migrate legacy crawl logic to new jobs framework #8826

Draft **Toflar** wants to merge 6 commits into `contao:5.x` from `Toflar:feature/crawl-job`

Conversation 0 Commits 6 Checks 0 Files changed 32

Toflar commented 2 weeks ago Member

Migrates all the Mootools and weird Ajax logic of our `Crawl.php` to the new jobs framework.

Requires:

- Implemented attachments for jobs framework #8818
- Ability to show multiple downloads which is missing in Implemented attachments for jobs framework #8818

Add a warning for too large database row sizes #4179

leofeyer merged 12 commits into `contao:4.13` from `ausi:fix/row-size-to…` on Mar 29, 2022

`getMysqlColumnSizeBits()` and `getInnodbColumnSizeBits()` calculates the amout of bits the column contributes to the row size.

`measureMysqlColumnSizeBits()` and `measureInnodbColumnSizeBits()` return the exact same information, but evaluate the amout of bits needed by trail and error against the database. (slow, only used for testing)
