Move the favorites button to the breadcrumb #8834

Draft **aschempp** wants to merge 1 commit into `contao:5.x` from `aschempp:feature/favorites`

This moves the favorite icon from the orange header bar to the breadcrumb. This both saves room in the header and makes more sense, because the current breadcrumb position (= current URL) is what you are adding to the favorites.

Currently darft because I'm not yet happy with the controller behavior.
