Unlock Twig for legacy templates in the core bundle #8809

Open **m-vo** wants to merge 6 commits into `contao:5.x` from `m-vo:feature/twig/allow-multiple-bases`

Conversation 2 Commits 6 Checks 17 Files changed 10

m-vo commented 2 weeks ago • edited Member

With this PR, it will become possible to ship Twig templates for our legacy PHP templates (e.g. a `mode_article.html.twig` together with the `mod_article.html5` template). If a bundle or the app already defined a PHP template for any of these, nothing will break - then the PHP template will just be rendered and/or extended/included instead.

m-vo added 2 commits 2 weeks ago

`allow shipping Twig templates alongside of PHP templates` `b89d7a5`

`adjust tests` `d7456a7`
