Allow selecting the backup within the `backup:restore` command #8465

leofeyer merged 8 commits into `contao:5.x` from `zoglo:feat/backup-sel…` on Jun 25

Allows selecting the backup when using the `backup:restore` command without the name argument:

1. Pressing `<enter>` will always choose the latest
2. Can use the index for the other backups

```
PS C:\Projekte\Test_Environment\contao\56> php bin/console contao:backup:restore

 Select a Backup (press <return> to choose the latest one) [[Backup]: backup__20250624195757.sql.gz]:
  [0] [Backup]: backup__20250624195757.sql.gz
  [1] [Backup]: backup__20250623172826.sql.gz
  [2] [Backup]: backup__20250617144233.sql.gz
  [3] [Backup]: backup__20250603160649.sql.gz
 > 2

 [OK] Successfully restored backup from "backup__20250617144233.sql.gz".

PS C:\Projekte\Test_Environment\contao\56>
```
